## DETAILED ACTION

### Remarks

1. In response to the After Final Amendment filed on January 30, 2006, claims 1, 3-6, 8-11, 13-16 and 18-20 are presently pending in the application.

### *Allowable Subject Matter*

2. Claims 1, 3-6, 8-11, 13-16 and 18-20 are allowed.
3. The following is an examiner's statement of reasons for allowance:

The Appellants' arguments in the After Final Amendment filed on January 30, 2006, have been fully considered and are found persuasive.

The prior art of record Neeman et al. (U.S. Patent No. 5,588,147) in view of Multer et al. (U.S. Patent No. 6,694,336), in further view of San Andres et al. (U.S. Patent No. 5,956,489), does not teach, disclose or suggest:

A method of reconciling changes made to a first file tree and a second file tree by determining changes corresponding to the file trees using a first change log and a second change log, wherein the method also determines whether reconciling the first and the second file trees creates an unresolved loop in at least one of the first and the second file trees, as claimed in independent claim 1.

Claims 3-5 are allowed because they are dependent on independent claim 1.

A computer usable medium having computer readable program code embodied therein for reconciling changes made to a first file tree and second file tree with a first

change log corresponding to the first file tree and a second change log corresponding to the second file tree in order to determine changes, wherein the program code is also configured to cause the computer to determine whether reconciling the first and the second file trees creates an unresolved loop in at least one of the first and the second file trees, as claimed in independent claim 6.

Claims 8-10 are allowed because they are dependent on independent claim 6.

A computer usable medium having computer readable program code embodied therein for reconciling changes made to a first file tree and second file tree with a first change log corresponding to the first file tree and a second change log corresponding to the second file tree in order to determine changes, wherein the program code is also configured to cause the computer to determine whether reconciling the first and the second file trees creates an unresolved loop in at least one of the first and the second file trees, as claimed in independent claim 11.

Claims 13-15 are allowed because they are dependent on independent claim 11.

A system for reconciling changes made to a first and a second file tree with a first change log corresponding to a first file tree and a second change log corresponding to a second file tree, wherein the system determines whether reconciling the first and the second file trees creates an unresolved loop in at least one of the first and the second file trees, as claimed in independent claim 16.

Claims 18-20 are allowed because they are dependent on independent claim 16.

4. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
